

Disaster Response & Relief

Arun Sahdeo
UNDP

Post- Disaster Activities

1. Response
2. Relief-Food, Water, Shelter, Health, Sanitation,
3. Reconstruction Program: to replace destroyed physical assets
4. Economic Recovery Program : to kick start affected economic activities and personal income

Lessons Learnt from past disasters

- Duplication of efforts
- Inappropriate assistance
- Inefficient use of resources
- Bottlenecks and Impediments
- Slow reaction to changing conditions

Lessons Learnt from past disasters

- Overwhelming Needs
 - Competing Priorities
 - Destroyed or damaged communication/transportation
 - A rapid influx of relief providers
 - Highly stressed local Government & Non-Government institutions
- 

Lessons Learnt from past disasters

- A status of chaos
 - Frustration of relief providers, officials and survivors
 - Rumors
- 

Complexities of response

- Sudden
 - Overwhelming
 - Deaths, injuries, sufferings
 - Situation changing every moment
 - Too many players with varying demands
 - Too little resources in command to start with
 - Too much of relief materials subsequently creating problems of storage, sorting, distribution
- 

Challenges of response management

- Infinitely more complex than other branches of management
 - Demands higher leadership qualities
 - Quick decision making
 - Mobilization of all available resources
 - Coordination with a large number of players
 - Working under extremely stressful condition for days together without rest and respite
 - Facing adverse criticism from media and other quarters
- 

Command, Control and Coordination

Communication

Law and order

Managing VIP visits

Information & Media Management

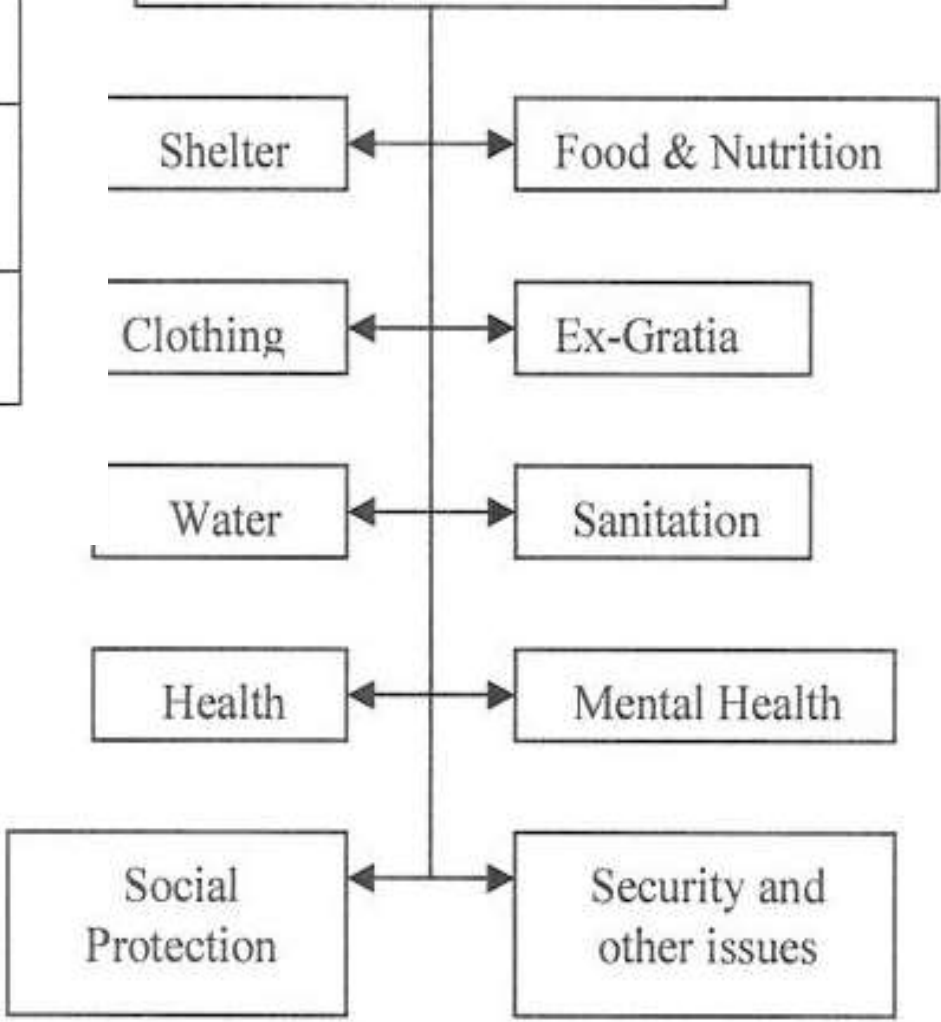

Rumour Management

Emergency Relief Management

Emergency Relief Management

- Response
 - Search and Rescue
 - Evacuation
 - Medical Aid

- Recovery
 - Damage Assessment
 - Planning
 - Resource mobilization
 - Reconstruction

Rights-based approach

Before:

People have “needs”

We help because we are “charitable”

Charity is an “option”

Give what you can

Today

People have rights

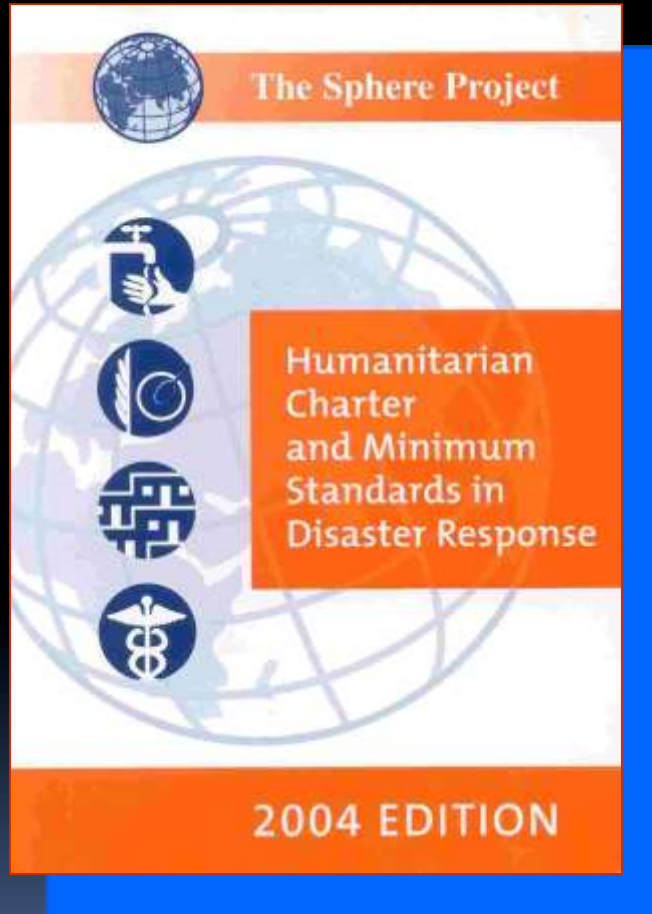

We help because we have a legal obligation

Legal obligations are not

Give according to standards which are based on rights/HRL/IHL instruments

Sphere: Minimum Standards

...offer technical “guidance” for assessment and

Water / San

**Food Security, Nutrition,
and Food Aid**

Shelter / sites

Health service

And... several “Common Standards” applicable to all sectors

Humanitarian Imperatives

- The humanitarian imperative comes first
- Aid priorities are calculated on the basis of need alone
- Aid is not used for political or religious gain
- Aid is not an instrument of foreign government policy

Humanitarian Imperatives

- Response respects culture and custom
 - Response builds local capacity
 - Response involves beneficiaries (participation)
 - Needs are met and vulnerability reduced
- 

Humanitarian Imperatives

- Humanitarians are accountable to receivers and givers
 - Humanitarians portray disaster victims as dignified human beings
- 

- Persons affected by natural disasters should enjoy the same rights and freedoms under human rights law as others in their country and not be discriminated against.

- When the natural disaster has occurred, persons affected by it should be treated with dignity.

- Appropriate measures should be taken as early and as quickly as possible to protect affected populations, in particular women and boy and girl children.

- Persons affected by disasters should, to the maximum extent possible, be provided with the means to recover as quickly as possible and become self-sustainable or with fast rehabilitation assistance for return.

A large, smooth, rounded boulder, likely a river stone, is the central focus of the image. It is positioned on a rocky shore next to a body of water. A person is visible in the lower-left corner, pushing the boulder. The text "DO NOT HANDLE ALONE" is overlaid in yellow on the boulder. The background shows a hazy landscape with trees and a body of water.

**DO NOT
HANDLE
ALONE**

Ian Davis

THANK YOU
